CERAMIC PRODUCT USED WITH  
WATER AND METHOD OF STAIN  
RESISTANT TREATMENT THEREFOR

THE COMMISSIONER IS AUTHORIZED  
TO CHARGE ANY DEFICIENCY IN THE  
FEE FOR THIS PAPER TO DEPOSIT  
ACCOUNT NO. 23-0975.

AMENDMENT

Assistant Commissioner for Patents,  
Washington, D.C.

Sir:

Responsive to the Office Action of November 12, 2002, the time for responding thereto being extended for one month in accordance with a Petition for Extension of Time submitted herewith, please amend the above-identified application as follows:

In the Specification:

Page 7, please replace the paragraphs spanning line 17 through page 8, line 5, with the following rewritten paragraphs:

The number of alkyl groups is preferably larger than the number of carbon fluoride groups when the stain resistant agent contains a terminal carbon fluoride group combining with the silicon-containing functional group and a terminal alkyl group combining with said silicon-containing functional group. Results of experiments conducted by the inventors show that the stain resistant agent does not contain only perfluoroalkylsilane. Consequently, the stain resistant agent has high lipstick stain and wear resistances.
